PROFESSIONAL SUMMARY

Product Manager with 7+ years driving 0→1 and platform-scale outcomes across enterprise SaaS, mobile/web/CTV attribution integrations, and AI product development. Known for turning ambiguous technical problems into structured roadmaps — leading cross-functionally across engineering, data, and C-level stakeholders without formal authority, and shipping at scale (500+ integrations across a 3,000+ partner ecosystem, 30% faster onboarding). Recently applied the same product judgment to AI-native development, independently designing and shipping a production RAG-powered assistant end-to-end — from problem framing through technical trade-offs to live deployment. Data-driven, customer-centric, and comfortable operating in ambiguity. Agile-certified (CSPO).

CORE COMPETENCIES

Product Strategy

- Product Sense & 0→1 Execution
- Ambiguity → Structured Roadmaps
- Prioritisation & Trade-offs
- Platform & API Strategy

Leadership & Discovery

- Cross-Functional Leadership
- Enterprise Stakeholder Mgmt (C-Suite)
- Customer-Centric Discovery
- Agile / Scrum (CSPO)

Data & AI

- AI Product Dev. (LLM, RAG)
- Data-Driven Decision Making
- Scale & Systems Thinking
- SQL · Postman · JIRA

PROFESSIONAL EXPERIENCE

Singular | Integration Manager (Functioning as Product Manager — Integrations & Platform)

Jul 2022 – Apr 2026

Global Mobile Attribution & Analytics Platform

- Cut enterprise onboarding timelines by 30% by standardising integration delivery frameworks and reusable templates — owning the end-to-end product lifecycle across mobile, web, and CTV attribution.
- Unblocked 500+ integrations across Singular's 3,000+ partner ecosystem by running structured enterprise discovery and shipping prioritised epics and user stories for SDK and S2S postback integrations via JIRA.
- Cut spec-to-delivery cycle time by ~40% by aligning cross-functional stakeholders on data pipeline architecture (REST API, S3, GDrive, email ingestion) through tighter functional specs and BRDs.
- Independently designed, built, and shipped a production AI-powered MMP Onboarding Assistant — live at singular-onboarding-assistant.vercel.app — using RAG across ten integration patterns, Edge-runtime streaming, and prompt caching to cut manual research time for new integration partners.

MoEngage | Senior Solutions Engineer / Solutions Engineer (Pre-Sales & Implementation PM)

Dec 2018 – May 2022

Enterprise Customer Engagement Platform

- Led C-level discovery workshops to define integration scope, data architecture, KPIs, and go-live success criteria — effectively functioning as embedded PM for enterprise implementations.
- Delivered 46.3% ↑ push & in-app conversions for Airtel by scoping and shipping a re-architected campaign integration, and 8× ↑ engagement growth for OYO Hotels via a full mobile engagement redesign.
- Drove 2× ↑ user engagement uplift for Flipkart through optimised deployment workflows and cross-channel attribution, synthesising client feedback into structured input for Engineering.

MEASURABLE PRODUCT & BUSINESS IMPACT

- 30% ↓ Enterprise onboarding timelines through standardised delivery frameworks and reusable integration templates.
- 46.3% ↑ Push & in-app conversions for Airtel after scoping and delivering a re-architected campaign integration.
- 8× ↑ Engagement growth for OYO Hotels via a full redesign of their mobile engagement implementation.
- 2× ↑ User engagement uplift for Flipkart through optimised deployment workflows and cross-channel attribution.
