

C.V.S.S. Subramanyam

Product Manager · SaaS & API Products · Enterprise & Growth

+91 934 011 0825 · subramanyamc09@gmail.com · linkedin.com/in/cvss-subramanyam8471a9114 · Bengaluru, India

PROFESSIONAL SUMMARY

Product Manager with 7+ years at the intersection of enterprise SaaS, customer success, and technical delivery. Deep practitioner of discovery, requirements definition, and cross-functional execution — having authored BRDs/FRDs, run C-level workshops, and driven roadmap influence across APAC, EMEA, and North America. Translates complex technical constraints into user-centric product decisions; proven track record of shipping integrations, data pipelines, and platform features that move business metrics for Tier-1 clients. Agile-certified (CSPO); fluent in engineering, data, and business languages equally.

CORE COMPETENCIES

Product Strategy & Roadmapping	Discovery & Requirements (BRD/FRD)	API / Platform Product Knowledge
User Story Writing & Prioritisation	Stakeholder Management & Alignment	Data Analytics & KPI Definition
Agile / Scrum (CSPO Certified)	Go-to-Market & Launch Planning	SQL · Postman · JIRA · Confluence

PROFESSIONAL EXPERIENCE

Product Manager (Integrations & Platform) — Singular

Global Mobile Attribution & Analytics Platform · Jul 2022 – Present

- Owned end-to-end product lifecycle for enterprise integration capabilities — from discovery and scoping through delivery and adoption — across mobile, web, and CTV attribution.
- Ran structured discovery with enterprise clients to surface unmet needs; translated findings into prioritised epics, user stories, and acceptance criteria delivered to engineering via JIRA.
- Authored functional specs and BRDs for new platform integrations; partnered with R&D; to sequence and ship features for previously unsupported partner ecosystems.
- Defined data pipeline architecture (REST API, Amazon S3, GDrive, email ingestion) and documented data flows to align cross-functional stakeholders on scope and success criteria.
- Built and maintained a resolution playbook for recurring API/SDK defect patterns — reducing escalation rate and improving engineering cycle efficiency.
- Managed integration documentation (guides, runbooks, FAQs) as a product asset — improving self-serve adoption and cutting average time-to-resolution across the client base.

Senior Solutions Engineer (Pre-Sales & Implementation PM) — MoEngage

Enterprise Customer Engagement Platform · Sep 2020 – May 2022

- Led C-level discovery workshops to define integration scope, data architecture, KPIs, and go-live success criteria — effectively functioning as embedded PM for enterprise implementations.
- Produced functional specs and data-mapping artefacts aligning business goals with platform configurations; drove UAT cycles through to stakeholder sign-off.
- Synthesised client feedback into structured product input for Engineering and Product teams; tracked feature requests through roadmap and communicated releases to clients.
- Identified and mitigated risks across concurrent enterprise programmes, maintaining delivery schedules and preventing scope creep.

Solutions Engineer — MoEngage

Enterprise Customer Engagement Platform · Dec 2018 – Sep 2020

- Acted as technical bridge between client stakeholders and engineering; translated business requirements into actionable integration and configuration plans.
- Contributed to onboarding documentation that reduced time-to-value for new clients; resolved SDK/API issues through structured debugging and payload analysis.

MEASURABLE PRODUCT & BUSINESS IMPACT

30% ↓	Enterprise onboarding timelines through standardised delivery frameworks and reusable integration templates.
46.3% ↑	Push & in-app conversions for Airtel after scoping and delivering a re-architected campaign integration.
8x ↑	Engagement growth for OYO Hotels via a full redesign of their mobile engagement implementation.
2x ↑	User engagement uplift for Flipkart through optimised deployment workflows and cross-channel attribution.
